

# WIDE ANGLE ATTACHMENT

for use with the MARK V and MARK Vb  
Director's Viewfinders

Wide Angle attachment with the Mark Vb  
Director's Viewfinder

## APPLICATION:

To extend the wide angle readings  
of the Viewfinder.

## DESCRIPTION:

The Wide Angle Attachment is specially designed and manufactured for use with the Mark V and Mark Vb Director's Viewfinders. The combination of the attachment and the Viewfinder will provide added wide angle range.

- **16mm cinematography:** the field will be the same as a 5.5mm lens.
- **Super 16mm:** the field overview will be that of a 6mm lens.
- **35mm cinematography:** the field will be that of a 10mm lens.
- **35mm anamorphic cinematography:** field will be that of a 20mm lens.
- **2/3" video:** the field will be that of a 5mm lens.
- **1/2" video:** the field will be that of a 3.5mm lens.

**The Wide Angle Attachment is supplied in a pouch for storage.**

## INSTRUCTIONS FOR FILM OR VIDEO USE:

1. Screw the Wide Angle Attachment into the threads on the front of the Mark V/Mark Vb viewfinder.
2. Set any film size or video format to its shortest focal length (wide-angle).
3. You may now view the field of any lens listed above or those with similar focal lengths.

## IMPORTANT:

The zoom should not be used with the attachment in place. The Mark V/Vb Viewfinder calibrations were not designed for such use and the visual image will be lacking in acceptable quality. Remove the attachment for normal zoom use.

5625 Melrose Ave., Hollywood, CA 90038, US
